## SUMMARY

---

As a recent computer science graduate with a passion for frontend development, I have experience building projects using modern web technologies like React, React-Router and Redux. Through my projects, including a weather app and a developer portfolio and many other, I have demonstrated proficiency in HTML, CSS, and JavaScript, as well as React's component-based architecture, hooks and Context API.

I am eager to learn and grow in a dynamic and collaborative tech environment, and am excited about the opportunity to contribute my skills to a team-oriented project. With strong communication and problem-solving skills, I am confident in my ability to take on new challenges and deliver quality results.

## PROJECT

---

### Weather app (react)

- Developed a dynamic weather app using React and styled components, featuring current weather conditions, hourly and daily forecasts, and geolocation-based search functionality
- Leveraged the OpenWeatherMap API to fetch and display weather data in real-time
- Implemented geolocation functionality using the Geolocation API to provide users with accurate weather data for their current location
- Overcame technical challenges in data fetching and display, and optimized app performance by implementing caching strategies and reducing API requests

### Developer

#### Portfolio (react)

- Built a modern and professional portfolio website using React and modular CSS, with each part of the portfolio decomposed into different components for optimal organization and maintainability
- Leveraged React's component-based architecture and Context API to create reusable and scalable components, improving the website's performance and user experience
- Utilized modern design principles and UX best practices to create a visually appealing and easy-to-navigate portfolio, visit my github for more.

## EDUCATION

---

B.Sc in Computer Science, Enugu state University of science and technology, December 2022.

**Relevant coursework:** Web Development, Database Systems, Object-Oriented Programming, Algorithms and Data Structures.

## KEY SKILLS

---

- |              |                |
|--------------|----------------|
| • HTML       | • GIT & GITHUB |
| • CSS        | • BOOTSTRAP    |
| • JAVASCRIPT | • REDUX        |
| • REACT.js   | • ROUTER       |
